# 4. SECTION 4 - FIRST AID MEASURES

# 4.1. Description of first aid measures

General notes : Please refer to the risk and safety statements (section 2)

**Following inhalation :** If inhaled : If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Remove collar, belt, tie... Give artificial respiration if not breathing.

**Following ingestion :** If swallowed: Immediately call a POISON CENTER or doctor/physician. Rinse mouth. Do NOT induce vomiting.

Following skin contact : If on skin (or hair) or clothing rinse immediately contaminated clothing and skin with plenty of water

before removing clothes. If the symptom persists, consult a doctor.

**Following eye contact :** Rinse cautiously with water for several minutes (15 minutes open eyelids). Remove contact lenses, if present and easy to do. Continue rinsing. In case of disorder, consult an ophtalmologist.

Self-protection of the first aider : In lack of appropriate formation, none initiative should imply an individual risk.

# 4.2. Most important symptoms and effects, both acute and delayed

See section 2

# 4.3. Indication of any immediate medical attention and special treatment needed

See section 2

# 5. SECTION 5 - FIREFIGHTING MEASURES

5.1. Extinguishing media

Printed : 10/05/2021

TOMATO LEAF BASE

Revised : V1-R-1-CLP from 10/05/2021

**Suitable extinguishing media :** Use an extinguishing agent suitable for the surrounding fire. CO2, powder, foam, specific liquid.

Unsuitable extinguishing media : Never use a direct stream of water.

# 5.2. Special hazards arising from the substance or mixture

Flammability : The product is not flammable.

Prevention : Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

Particular risks linked to exposure : see section 2

#### Hazardous combustion products :

Release of poison gases : Monoxide de carbone (CO), Dioxyde de carbon (CO2), Oxyde d'azotes (NOx), Dioxyde de soufre (SO2), Cyanures (CN) ....

## 5.3. Advice for firefighters

**Fire-fighting equipment :** use an appropriate personal protective equipment with an approved positive-pressure self-contained breathing apparatus.

# 6. SECTION 6 - ACCIDENTAL RELEASE MEASURES

#### 6.1. Personal precautions, protective equipment and emergency procedures

Call immediately the emergency personnel.

Promote adequate ventilation in the area.

For non-emergency personnel

Keep them away from the area. Avoid all sources of ignition (spark of flame). Avoid skin/eye contact. Do not inhal vapours.

For emergency responders

Use personal protective equipment. In case of accidental spills, wear protective gloves during the handling.

#### 6.2. Environmental precautions

Avoid the dispersion and flow of the product. Keep away from drains, surface and ground water. Inform the competent authorities if the product enters in ground or surface waters.

# 6.3. Methods and material for containment and cleaning up

#### For containment

The spillage is contained with sand or inert powder. The chemical waste is placed in sealed containers.

#### For cleaning up

The soiled elements (rags, absorbent papiers, filters) are immediately soaked into water. The chemical waste are rapidly treated according to the local reglementation

Printed : 10/05/2021

TOMATO LEAF BASE

Revised : V1-R-1-CLP from 10/05/2021

Other informations

Only qualified personnel is allowed to clean up.

#### 6.4. Reference to other sections

See section 8 for personal protective equipment and section 13 for waste treatment.

7. SECTION 7 - HANDLING AND STORAGE

## 7.1. Precautions for safe handling

Protective measures: See section 2.2

<u>Measures to prevent fire:</u> Do not smoke. Do not expose to excessive heat or ignition sources (spark or flame).

<u>Measures to prevent aerosol and dust generation:</u> Maintain adequate ventilation in the area.

Measures to protect the environment:

Avoid spreading product and keep it from spilling. Precautions or coming in contact with the ground, waterways, drains and vents.

Advice on general occupational hygiene: Follow the general hygiene rules.

#### 7.2. Conditions for safe storage, including any incompatibilities

Storage conditions: Store in its original packaging in a cool dry place, away from light.

<u>Technical measures:</u> Close the container after use. In case of transferring, reproduce the labelling.

Packaging materials: Preserve only in the container of origin.

Respect the general rules of incompatibility.

Storage :

# Store in ambient room, in tightly sealed original container. Avoid prolonged exposure to light, heat and air.

## 7.3. Specific end use(s)

Wash the hands and any other zone exposed with soap and water before eating, drinking, to smoke and before leaving work.

# 8. SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

#### 8.1. Control parameters

Measures of technical order : Avoid contact with eyes, skin and closes. Do not ingest. Do not inhal vapors. Use

proper personal protective equipment.

10/05/2021

**Monitoring procedures** : If the product contains ingredients presenting exposure limits, he can turn out necessary to make an examination followed by the persons, by the atmosphere in the workplace either bodies living to end the efficiency of the ventilation or the other control measures or estimate the need to use of the material of protection of respiratory tracts. It is important to put back you in the European standard EN 689 concerning the methods to estimate the exhibition by inhalation to the chemical agents and to the national general documents of politics relative to the methods to determine dangerous substances.

# 8.2. Exposure controls

Appropriate technical controls :

No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure.

Personal protection measures :

#### **Personal protection :**

-Protection des mains : Protection non requise.-Protection des yeux : Protection non requise.

-Protection respiratoire : En cas de ventilation insuffisante, porter un appareil respiratoire approprié.

**Respiratory protection**: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates that is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Filter apparatus (dust masks or half masks)

<u>Type of filters</u> Type AX (Brown) : Organic compounds boiling point < 65°C Type A (Brown) : Organic compounds boiling point > 65°C Type B (Grey) : Inorganic gasses and fumes. Type P (White) : Particles, dusts and aerosols

Hand protection : Impermeable and chemical resistant gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary

>8 hours before piercing : vinyle disposable.

**Remark**: Recommended impermeable goggles do not only depend of his matter. Other factors can have a signifiant effect on impermeability, like their thickness or specific use or temperature conditions. In all cases, matter certificates should be selected. Ask your supply if the goggles are appropriate to this use.

**Eyes protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Recommanded : Splash googles, safety glasses with side-shields.

**Skin protection** :Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Body : Recommanded : lab coat (sarrau), general.

Type 3 : Liquid impermeability

Type 4 : Aerosol impermeability

Type 6 : Impermeability limited to liquid splashs

Foot : Recommanded : neoprene

Upper and sole resistant and impermeable (Hydrocarbure resistant).
